Title:

Comments: Although I currently live in XXXXX, I have lived in McCall, and intend to again in the near future. I hope that any trail closures, or trail designation changes are fully discussed with users, and clubs willing to participate in the maintenance of these trails. Citra and other clubs are willing to assist, through volunteer hours in clearing, and repairs to improve problem areas, related to erosion, and other scenarios.

An open discussion about side by side impact should be on the table in these areas as well. It is a very rapid growing segment, and may need specific trails, to reduce conflict between users, and motorists. Old logging roads could offer an opportunity to let them travel and enjoy the area in their way, with fewer incidents. I also suggest keeping SXSs and motorcycles, and mountain bikes on separate paths. The speed differences, and overall experience is very different. Please work with those willing to participate and work for the use of the area. Recreation is important to the American Way. Shoving everyone into parks.
