Comments: I am a trail user and would like to see the existing trails in this area maintained, namely Bally Mountain, west side of Granite Mtn., Hard Creek, 6 Mile. I have personally cleared these trails with a friend but there is more work that needs to be completed than just clearing trail. There need to be reroutes and some bridge work and on open slopes, the trails need to be better defined. Having better/more up to date trailhead signage is needed along with updating the USGS and Forest maps of where the actual trail is located. We have found that the topo maps and actual trails don't always line up.
