Comments: I like the proposed recreation improvements and would add to the proposed changes the following:

-Move the Brundage Reservoir toilet from across the road above the reservoir to the same side as the reservoir. A vault toilet only needs to be 50 feet from a water source. I used Google Earth and was able to find a great location of a new vault toilet that would meet that criteria. Due to the current location, a lot of public do not know about it. The site where the toilet currently sits could then be rehabilitated and returned to a native surface with the parking area removed or made into a dispersed camping site.

-Better designate all trailheads with better signage and complete heavy maintenance on all existing trails within the project area including Granite Lake trailhead (Cougar Creek), Granite Mtn LO (west and east sides), Bally Mtn., Hard Creek, and Six Mile.

Thanks!
