Title:

Comments: I am writing to support the management goals of the Granite Meadows CFLRP. I especially appreciate the inclusion of the non-motorized recreational aspects of this project. I support separation of motorized and non-motorized recreational uses to minimize user conflict. I am an avid mountain biker, hiker and cross country skier and utilize the Bear Basin area year round to find my personal bliss and well being as well as to entertain visitors from far and wide. I support the improvement of recreational opportunities close to town and the expansion of the summer trail to include both sides of the 451 road. I am also in favor of legitimizing several high use, user created trails in the area. Recreation is a key component to supporting Valley County and Adams County economies and the health and emotional well being of the regions residents. Thank you for the opportunity to comment. Sincerely, Karen Olde
