Comments: Wayne National Forest Single Track Trails!

Ms. Neuenfeldt,

I am writing you regarding the addition of single track trails at the Wayne National Forest. My self, my wife and our 3 children all massively enjoy riding dirt bikes. We live in Michigan but make at least 2 trips a year to ride in Southern Ohio, mostly the Monday Creek trail system. All 5 of us would agree that adding single tracks would be loads more fun but also it would add to our safety when on the trails. When we ride on 50 inch trails there is always the fear of a larger machine coming too fast around the next corner. The 4 wheeler/SXS will always win against a bike. Don't get me wrong we all understand that riding on two wheels is dangerous, all 5 of us have crashed and had injuries. The reward of a good day riding and the bonding our family gets to do on the trails FAR out way the risk of crashing, that is why we ride! Adding single tracks to any trail system makes it safer for people like us on two wheels and eases the minds of parents like us. We greatly appreciate your consideration in this matter. Thank you very much for your time!
