Comments: Wayne national single track

I strongly agree with the idea of adding single track to the trails. I can guarantee you'll attract alot more dirt bike riders by adding single track that is tight and technical. Most dirt bike riders want tight and technical with difficulty compared to almost all existing trails that are really easy and hard packed from ATVs and utvs. The only part of Wayne I'll ride is the longridge trail head because not as many people know about it so the fear of hitting ATVs or utvs head on is alot less. I personally would ride Wayne national alot more often and I know the friends I typically ride with would too if you add as many miles possible of single track. And make many spots where there's no chance of quads fitting so they don't ruin it. Thanks for your time and hopefully we all hear some good news soon!!
