Comments: Single track:

Hello,

As an Ohio resident and rider, I'd like to see the addition of single track to the Wayne National Forest trail system.

The current trail system leaves a lot to be desired for a rider like myself. The trails are too wide and far too easy. I'd love to see the addition of challenging single track loops as part of the trail system. I currently have to go to WV to get my single track fix and as a result spend way too much in that state. I'd really like to support my home state instead and create a draw for riders from neighboring states. I know Wayne has the terrain that would draw other single track riders in if the trails where there.

Please take the time to consider making decent single track a reality at WNF.

Thank you,

Nicholas Daniels
