Title:

Comments: We support the Forest Wide Veg Management Project #55257 because the CO economy and the safety of CO citizens and their homes and businesses increasingly depend on healthy forests. The recent experience of wildfires in the West and the particular tragedy of Paradise, CA mandates that action be taken to prevent same in CO. We live in Morrison but frequently visit our condo at Keystone in Summit County. The Buffalo Fire was a wake-up call reinforcing the value of treating our forest lands proactively.
