Comments: To whom it may concern,

The redesign action of our forest have gotten out of control. It seems now days more and more closures are happening based on the voices of a few, when in reality we need to be considering the abundance of people locally and nationally that use our land for hunting and recreation. Some of these people may not have the means to voice there thoughts so I am doing just that for the thousands of people who rely on these lands for so many different purposes. We need to STOP CLOSING PUBLIC LANDS!!! Wilderness areas are hazardous to our ecosystem. I object to and further closures and Insist on reopening previously closed public lands. Thanks you.
