Comments:

I am for stopping the round up of wild horses by Helicopter, and in favor of letting people by horseback round them up. Or letting nature take it course. By running the horses it is cruel, to the animal and can end with the horse being hurt which is not called for by letting nature take it course the heard is thinned out on its own. Or if need be to heard them use people on horseback that can take into consideration the physical conditions of the animals that are being heard.

Thank You

Cindy Wood
