Comments: I spend a considerable amount of time in the outdoors. As I get older I spend more time car camping and mountain biking and I am often frustrated that wilderness areas restrict bikes but not cows access to wilderness areas. That said I am very happy and willing to give up biking in potential wilderness areas and to have as much wilderness area as possible for the common good. We must perserve as much as possible not just for humans but more for perserving nature. I am specifically interested in Lemhi, Borah, Pioneer and Copper Basin areas.
