Comments: To whom it may concern,

I am a hang glider pilot with 25 years of flying experience. As such I know how difficult it is to procure and new foot launched flying sites due to legal, property, and other concerns. As such I hope that you to consider the significant impact that revocation of this precious site to the non-motorized foot launched flying community represents.

Our sport is a non-motorized very low-impact, highly aesthetic, activity that affords pilots incredible vantage points from which to appreciate the beauty of our natural environment and parks. Please consider the value of this site to our flying friends and neighbors when deciding the fate of this part of the Salmon-Challis Forest.

I appreciate everything you do to preserve the parks for all to enjoy and hope that you are able to balance your preservation goals with the our desire to preserve what is a very special flying site for the foot launched flying community. Sites like King are irreplaceable to us and increasingly rare.

Thank you for your consideration in this matter.

Best regards

Kale Kudlacek
