Comments: I am a Hang Glider Pilot from Houston, Texas and I have heard that King Mountain may be shut down. Here in Texas the only way we can fly is with a special tow plane that pulls us up to altitude. For us Texans, the idea of foot launching a Hang Glider from a mountain is like a dream. King Mountain is well known throughout the Hang Gliding community as a "mecca" that every pilot must visit.

I have been training in Oklahoma in the Ouachita Mountains and now am a competent foot launching pilot, this has taken years of hard work and dedication...with the ultimate goal to drive to Idaho and Fly above King Mountain. Please reconsider shutting down access for Hang Gliders.

Sincerely,

Tyson Taylor
