Comments: This is one of the few locations that I would like to fly my hang glider at. I'm a retired veteran of the US Army. My PTSD has taken me out of the fight, and I am doing everything I can to find a reason to live. I have recently started to hang glide and had hoped to fly at King Mountain.

Not much has been able to keep my daily dangerous thoughts away, and most days I can hardly get out of bed... Except on days that I'm lucky enough to go hang gliding.

There are not many places that are available to do this sport, and we in the sport are very worried about losing any of the few locations we do have available to us to fly. Please help me keep the road to the launch, and the flying space open to hang glider and paraglider pilots.
