Comments: Please do not close the access to King Mountain flying site! This is an invaluable site for the USA free flying community! It is one of the best gliding sites in the USA!

Gliding is a beautiful and environmentally friendly sport. We soar without the use of fossil fuels, and for the most part, glider pilots care about the environment deeply.

It is my understanding that if the forest service designated King Mountain as a wilderness area, then the road to launch would be closed, and access to launch would be prohibited, likely ending pilot's access to the site.

Please, please do not let this happen. Please take into consideration the free flying community when you make decisions regarding King Mountain.

Thank you so much.

Regards,

Jac
