Title: Mr.

Comments: The American Wild Horse is an Iconic Symbol of our Great Country. Relocating horses to areas outside of their natural habitat and placing them in captivity or worse destroying these beautiful creatures is an abomination to our lands, our country, our people and all mankind. As the elite race it is our duty to preserve the natural world and all of its species which balance our ecosystems. To suggest the removal of horses or any other species is to suggest the destruction of our lands and should be considered treason against our country.
