Last name: Pitcher

Organization:

Title:

Comments: Please do not Alter the existing Forest Plan in a manner that would close or limit public access to the already developed King Mountain Hanfgglding /Paragliding site. There already is a existing road and developed site,changing this area into a Wilderness Area would be disallow already existing non powered flight at one of the premier flying sites in Idaho. The local economy would be negatively affected as visiting pilots spend time and money in the surrounding communities, non powered flight is a extremely low impact activity and should remain as a recreational activity -this is good use of Public Land.
