Comments: single track trails

Dear Wayne officials

US two wheel motorcycle woods riders would like to have single tract trails in the national forest. The motorcycles do not mix to well with Atv's or Utv's. It is very dangerous for people on bike's to come in contact with utv's and the wide trails are not much fun for true woods rider's. If we had a good single track system in the Wayne it would attract more riders to the area and would be a lot safer. And I believe that the M/C does less harm to the land.

Best Regards

Rick Eskins
