Comments: Wayne National Forest Single Track

Dear Rachel Neuenfeldt,

I support responsible off-highway vehicle recreation on public land, and I ask that consideration be given to developing single-track motorcycle trails in Wayne National Forest in Ohio.

Off-highway motorcycle recreation brings families together and provides opportunities for generations to interact and enjoy public lands.

Trails designed specifically for motorcycle use are safer, have less environmental impact, are far cheaper to build and maintain, and are more enjoyable than wider trails that allow the passage of four-wheeled OHVs.

I have purchased many annual and shorter-term permits for riding off-highway motorcycles in Wayne National Forest. However, in recent years I travel to other areas of the country to ride. The density of ATV and UTV use in the Wayne National Forest is such that it is not enjoyable or safe to be on the trails on the weekends. If single-track motorcycle-only trail is not added to the trail system at Wayne National Forest, I am more likely to spend my time and money riding where single-track motorcycle-only trail is available.

Please approve the addition of single-track motorcycle trails in Wayne National Forest.

Sincerely,

Gerald Andy
