Comments: Single Track Wayne National Forest

To whom it may concern;

Hello, I am an avid motorcycle rider who frequents Wayne National Forest up to 10 times per season. We come with our bikes and stay for 3-6 days each time. We have always wished for single track trails for our bikes where we can enjoy the environment on a different level without certain 4 wheel vehicles in our paths. We love everything that has been done in the past 15 years at the park and we enjoy adapting to the changes. Single track trails designated for dirt bikes only would greatly enlarge the size of the riding area and give us another legal way to explore what WNF has to offer. We love the forest, and we want more. We are very respectful of nature and the rules and regulations that keep these privileges open for exploration. There is so much unexplored in the WNF area and the only way to see it will be the single tracks.

Thank you very much!

-One dog, many bikes.
