Comments:

Please add single track to the Wayne National Forest it is hard enough to get my friends excited about paying to go ride anywhere besides a racetrack single track attracts men and women of all ages and from all over the place I have at least 1200 followers on social media who everyday we all talk about where we're going to ride somewhere up in British Columbia Northern California Utah etc.... the point is without single track you're going to lose out people that ride dual Sports travel great distances making it huge Journeys make camp out just to ride your single track people like myself are willing to travel far and wide to check out new single track
