Comments: WNF single track wanted

To whom it may concern,

My family and I have been riding the WNF trails for over 30 years. During that period of time we have seen many revisions to the trail system, some for the better and some worse.

One element that seems to be missing is the addition of single track trails available at WNF. Many years ago, part of the fun of riding there was the challenging, technical trails. Over the years many of these have been shut down and closed. I see this as detrimental to the success of the WNF riding areas. Many occasions have seen our group drive by WNF on the way to other riding areas to ride this type of trail.

In my opinion, opening a series of single track trails would be very easy. Many of the old single track trails are still there and could easily be mapped and ridden as is. No crew would be needed to cut trails, it would literally just be as easy as marking them on the map and allowing us to ride them again.

If you need a group of riders to show you where these trails are located our group would be more than happy to assist. As I mentioned, several of us have been riding WNF for 30&#43; years and know our way around.

Thanks for your time and consideration.

Rodney Harp
