Comments: Fw: single track and wider trails?

Considering the many times we spend going to Hatfield/McCoy System in West Va. is there any chance that Wayne will widen the current trails so people with side by side and 4 passenger SXS can experience the trails with their children and grandchildren without the long trip to the south? Most of the bridges have been replaced making it suitable for wider machines. Also, adding a dedicated single track for dirt bikes would be greatly appreciated as there would not be much maintenance involved. You would have to keep it tight, especially at the entrance to keep the ATVs from entering. The single tracks at Hatfield/McCoy have no problem with ATV traffic, in fact, without the signage at the track entrance, you would not know it was a single track. I realize that Wayne is not a Hatfield/McCoy, but as many of us have traveled out of state, I think Wayne is "missing the boat" with the ATV crowd. We've done H/M since 2006 with the 34th trip coming up in Jan. 2019. Sure wish Wayne would expand and advertise it. Thanks for my .02 worth Don
