Comments: single track and wider trails?

Considering the many times we spend going to Hatfield/McCoy System in West Va. is there any chance that Wayne will widen the current trails so people with side by side and 4 passenger SXS can experience the trails with their children and grandchildren without the long trip to the South? Most of the bridges have been replaced making it suitable for wider machines. Also adding a dedicated single track for dirt bikes would be a plus. I don't think there would be much maintenance involved with the single track. It would have to be tight at the start to keep ATVs out. The single tracks at H/M are barely noticeable, with only the signage indicating them. I realize that Wayne is not a H/M, but with many of us traveling out of state, I think Wayne is "missing the boat" with the ATV/OHV crowd. We've done H/M since 2006 with our 34th trip coming in Jan 2019. Sure wish Wayne would expand and advertise it! Thanks for my \$.02 worth! Don
