Comments: The State of Idaho and especially Sun Valley where I had the chance to spend my last year are very special to me. It's difficult to explain, but I feel magic in this place. I am from Poland and I came here for the first time last summer, 2017, thanks to Work and Travel Program. At the beginning I didn't know what to expect, but after a few days I fell in love with this place. That's why I decided to come here again and stay a whole year. During my stay I did a lot of different activities: cycling, rafting, backpacking, skiing and hiking a lot. All of these experiences evoked in me a deep sense of appreciation and awe for its beauty and pristine nature. Amazing mountains and beautiful landscapes around motivate you to do something, don't stay passive, leave your apartment and interact with the environment which I can dare say is unique here. I really would love to protect them, because there are not many magnificent places in the world such as this. People here feel happy to have a chance be part of this exceptional place. In my opinion, this area is for sure one of those that deserve special attention.
