Title:

Comments: opening acreage for oil and gas exploration and drilling

to whom it may concern,

i have traveled extensively in this part of nevada and the area you are considering opening to exploit, is one of the most beautiful areas of nevada.

this part of the country is magnificent and should be protected for the future generations. we want to be closing the fossil fuel chapter, so let's not destroy any more wild places to feed a dying industry.

put your money into solar/wind investment - and leave the fossil fuels in the ground.

for future generations and for the wildlife that calls this place home.

thank you,
