Comments: The concept of Wild and Scenic Rivers is a great one, with, from my perspective one significant issue - the associated Federal reserved water right that comes with the designation. I could find no mention of this in your draft evaluation (perhaps I missed it?) but it is a significant factor that the public needs to be aware of. In my experience, much of the opposition to WSR designation is based upon the associated Federal reserve water right and the ramifications, known and unknown, associated with the designation. At this stage in your planning process, this still needs to be disclosed to the public, discussed and evaluated.
