Comments: Hello,

I have been recreating at the slate river, from gunsight bridge down for 2 decades. It has been a great escape with the children and now grandchildren. We have updated our recreational equipment to include paddle boards. It would be detrimental to our recreational opportunities and social outings if any section of the river was closed off to users. We respect wildlife and practice low impact activities.

I also would like to see a recreational path follow all reasonable streams and rivers. These paths are an alternative source for transportation and constructive mental health
thank you,
