Subject: RE: Mid Swan document

Arlene,

Thank you for notifying us that the link for the November 8 public meeting presentation was not working. I have fixed the link and it is working now. The document was posted on the project page as it may be of interest to many people, but there is no requirement that a notification be sent to all 500 plus people on our project mailing list when we post a supporting document.

I have shared your email and request to extend the comment period with Forest Supervisor Chip Weber, and he will not be extending it at this time. He believes the remaining 10 days in the comment period is sufficient time to review the presentation.

Thank you for your interest in this project. Let me know if I can help with anything else.

Subject: Mid Swan document

Hello

I saw on the Flathead website that a supporting document (Scoping Presentation Nov. 8 Public Meeting) was posted to the Mid Swan Project page on December 3. The public was not notified that this document is now available.

However, the link is bad and nothing shows up in the screen, and the pdf download has an error message: "Acrobat could not open '110188_FSPLT3_4499574.pdf' because it is either not a supported file type or because the file has been damaged (for example, it was sent as an email attachment and wasn't correctly decoded). To create an Adobe PDF document, go to the source application. Then print the document to Adobe PDF."

I had asked for that document on October 24th, then it was not posted in a timely manner so I asked again on November 29th, now ten days before the scoping deadline there is a document that the public wasn't notified about and is unreadable on your website.

The other documents and assessments for the Mid Swan project that I requested on November 29th have not been posted or received yet either.

Please correct the error with the scoping presentation, inform the public of its existence and extend the comment deadline so the public has the benefit of the scoping presentation and assessment(s) that form the basis for your proposed action.

Thank you,

Arlene Montgomery
