Comments: I recommend Copper Creek located in the Maroon Bells-Snowmass Wilderness in consideration of the Wild & Scenic Rivers Eligibility Report. I personally have hiked through Judd Falls to follow Copper Creek up to Copper Lake many times. This creek receives heavy traffic in the summer and should be assessed to protect its outstanding remarkable values.

I am an avid outdoor enthusiast that seeks opportunities to protect the scenery and its recreational fisheries. I continue to explore the Maroon Bells - Snowmass Wilderness area to appreciate the unique native trout habitats and unique ecosystems that are unlike any other region.
