Comments: I stand by the following statement.

OHIO RIVER FOUR WHEELERS and Friends of The Daniel Boone National Forest oppose the proposed changes because the changes are too broad and lack transparency.

* We demand that whenever the USFS wants to take an action, like closure of an area, that it be handled through the proposed action process so a public comment period occurs to avoid agency over-reach and steer the action to a balanced solution.

* We refuse these changes because the generic terminology and wide geographic areas impacted will adversely affect the human environment.

* We refuse the changes because the changes may affect our roads and trails and consequent humans ability to travel through the forest.

* We refuse the changes because this could lead to roads and trails being closed which inhibits our ability to fight or escape from forest fires.
