Comments: I am concerned about the impact this will have on the snowmobiling trail system. I live in NY and travel to Vermont multiple times every winter to access the woodford trails. These are some of the best trails in the north east and it would be a shame to loose access to any portion of them.

Please consider the impact this project would have on the snowmobiling community and how it would negatively impact local economies dependent on snowmobile tourism. This is a very popular trail system and I think it would be possible to move forward with your plan without impacting the trail system, and maybe even opening ope new trails.

Thanks,

Chris
