Comments: Hello,

I'm writing to object to the proposed amendment to the Forest management plan to curtail protections for endangered bats. It is very clear this amendment is not designed to protect wildlife but to permit more logging and profits for private interests. The U.S. Fish and Wildlife Service has stated, "If the action is carried out as proposed, an increase in adverse effects on federally-listed species is anticipated." This is simply unacceptable to me and not representative of my values or those of many, many Kentuckians.

Thank you,

Justin Bench
