Comments: Dear Sir or Madam,

I ride bikes. I love bikes. I love to ride my bike wherever I can. But this I know: Man is a bad animal and bikes do not need to be everywhere. Designate as much Wilderness as possible, and keep bikes and other inventions of Man out of Wilderness areas-now and forever. Man is a bad animal that ruins everything it touches. Man is like a lethal virus. We do not need to extend the reach of Man into Wilderness areas by allowing bicycles.

Please designate the area as Wilderness and do not allow bicycles into Wilderness areas.

Thank you.
