Comments: Without the mine Big Timber will slowly die. The town depends on it and East Boulder has a excellent environmental record here! Most people don't know that they are the only natural US producers of palladium which is used to make catalytic converters which I would say should be more important to the environment than this proposal. Without the ability to expand you would be insuring the eventual death of this branch of the mine and killing the community that depends on it. Shame on you for not doing your research before signing a petition as important as this!
