Comments: None of the alternatives are acceptable to me. There is not a single option that increases the area available for motorized use. How are motorized users supposed to choose an option to support when none of the options provide a benefit to us. It seems that you are not actually providing alternatives at all. Please scrap this plan and don't adopt a plan until you can show that you're interested in actually benefiting the PUBLIC. That includes everyone, especially locals, ederly, and disabled persons who enjoy motorized access.
