Title:

Comments: My family (including two children) visit this area frequently as we have family who live close by. We're extremely concerned about the proximity of the proposed shooting range to popular hiking trails. We've hiked this area many times, and I won't be comfortable hiking in this area if the shooting range is built as planned. We also have family who spends much of their time at shooting ranges (some of us have gone as well), and we feel that this can be better placed in a safe place that doesn't pose risks to hikers or others.
