Comments: This is concerning the flying site on King Mountain used for Hang gliding and Paragliding. First, i would like to say that i am glad the comment period has been extended. When i first heard about this, the comment period was already closed. The road and launch area has been used for decades. This site is world famous. The fliers that visit this area bring business to the economy of this area while creating little impact. Other areas in the country have made exceptions allowing flying, a national park in Virginia, or wilderness areas in California, to mention a few. It is the road up and the launch area. Once flying, any landing is in the valley, or some other valley possibly far away. Thank you for your consideration in this important matter. Walt Kirby
