Comments: I prefer Alternative D because of its focus on restoration of the landscape. I would like certain areas free of motorized vehicles that may disturb wildlife habitat. This plan also has a lower percentage in terms of timber production and timber harvest (18% compared to 19%). It also holds the greatest amount of recommended wilderness areas. I read the recent United Nations climate change report. It is disturbing. I want wilderness areas to be protected for my grandchildren and their children and so on. Please help protect wildlands, wildlife, and biodiversity.
