Title:

Comments: I am commenting on Alternative D and would like Bison to be considered a Species of Conservation Concern-they are our National Mammal after all.

I would like to see all barriers for natural migration to be removed allowing these iconic animals to roam their historic range without hazing or harassment from rangers OR ranchers!

Over the past several years-I have been speaking out against trapping and shipping bison to slaughter and will continue to do so until Yellowstone, Montana and ALL involved treat OUR National Mammal with MORE respect and PROTECT them!!!
