Dear Objection Reviewing Officer:

I would like to make some objections to the Medicine Bow Landscape Vegetation Analysis.

I have fished, camped, and hiked in the Medicine Bow, and have been surprised by the amount of roads, and the little attention given to other uses of the forest other than logging.

This LaVA has too many miles of new road[mdash]and there are too many already.

Too much is planned to be forested, and it has less actual forests area than other National Forests.

I have a huge concern about the costs of this project[mdash]the taxpayers are going to be covering most of the costs, and the Medicine Bow's budget doesn't seem to have enough money already to take care of appropriate signage, and taking care of campgrounds.

We need to keep climate change in mind, and understand that regeneration will be slower.

Thank you,

Kris Korfanta
