Comments: Our wild places keep the planet healthy for all life--we must protect every remaining one we've got. I support the wilderness recommendations in Alternative D of the Revised Draft Forest Plan; however, they must be improved by adding the entire 230,000 wild, roadless acres of the Gallatin Range as Recommend Wilderness in the final forest plan. We must not allow human activity and development to compromise the natural state of this or any other wild space. The health of our world depends on it. Thank you for all you can do to safeguard our wilderness lands.
