Comments: As custodians of our public lands and wildlife for us and future generations, it would seem obvious that offroad vehicles are not compatible with this sensitive environmental and animal wildlife situation. I believe it your PRIMARY AND FIRST DUTY TO PROTECT THIS LAND AND WILDLIFE FROM DAMAGING AND DESTRUCTIVE FORCES. This would seem obvious and i am expressing my outrage that you would consider such damaging forces as offroad vehicles in this type of public land. At this point, the animals have nowhere else to go. MAny are endangered. Please use good sense and the long term public interest and leave these lands pristine and not accessible by offroad vehicles.

Richard Schwartz
