Comments: Please protect all Wildlife and animals in this revision plan. Unfortunately, wildlife, meaning warm blooded animals, who have emotions and feel pain and have loved ones, just as humans do, are never considered, when planning revisions to forests. Normally only monetary gains are considered. I have just heard too much this past year about fracking and exploration for oil, along with drilling in our oceans for oil and gas. Enough is enough. Please consider all options, before destroy more animal habitat. Thank you for your time and consideration.
