First name: Roger

Last name: Breeding

Organization: 1970 Star Ridge Rd

Title:

Comments: All of the factors mentioned above prove that the best approach to managing the forest well into the future is to provide the best protection available to all undeveloped lands. The means recommending wilderness designation for all inventoried roadless lands as well as the HPBH WSA and other roadless areas. Letting these lands remain an untouched as possible will allow forests to continue their natural processes that enable wildlife to flourish and ensure clean, abundant water supplies.
