Comments: The Forest Service should reduce group size limits.

Fish stocking should not be done in naturally fish free wilderness lakes. This would help with the pack animal feces contamination.

Vacant grazing allotments in the Wildernesses should be closed so these areas can return to a wild condition.

No trail construction or reconstruction in the currently trailless areas.

Please support Alternative D of the Revised Draft Forest Plan. It can be improved by adding the entire 230,000 wild, roadless acres of the Gallatin Range as Recommended Wilderness in the final forest plan.

The plan should prohibit all motorized and mechanized uses, and any other activities not consistent with wilderness protection, in the Recommended Wilderness areas so as to preserve their wilderness qualities until Congress acts on the wilderness recommendations.
