Title:

Comments: I am writing to you today in support of Alternative D being considered as part of the Forest Plan Revision now under consideration.

Alternative D is my preferred alternative, but with several additions it will be even stronger as a protection for our Wilderness.

1. Large groups do disproportionate harm; please see that groups are limited to no more than 12 persons and 8 stock (horse/mule).
2. The plan should specifically call for a halt to stocking naturally fishless wilderness lakes.
3. The plan should include human and stock feces management.
4. Abandoned grazing allotments should be vacated and closed permanently.
5. Trailless areas of the Absaroka Beartooth and Lee Metcalf Wildernesses should NOT have trails added.
6. The plan should explicitly prohibit all motorized or mechanized uses along with any other activities not consistent with wilderness.

Thanks!

-John Butler
