Title:

Comments: Alternative D is the best and should be selected. Revisions that would improve that include the following:

Preserving the wild quality of the area as much as possible, by decreasing number of animals and people permitted in groups, not stocking fish in lakes where they do not occur naturally, letting unused grazing allotments end, and not putting in new trails in the wildernesses.

Also, all the roadless areas in the Gallatin range ought to be designated as Recommended Wilderness in the final plan.

Thank you for the opportunity to comment.
