Comments: As part of the Forest Plan revision process, the Gallatin Range-stretching from Bozeman to Yellowstone National Park-including the HPBH WSA, is particularly at risk of being sacrificed as a motorized and mechanized recreational playground for the exploding populations of Big Sky and Bozeman.

This is not acceptable to any citizen.

The plan should prohibit all motorized and mechanized uses, and any other activities not consistent with wilderness protection, in the Recommended Wilderness areas so as to preserve their wilderness qualities until Congress acts on the wilderness recommendations.

THIS IS HOW WE / YOU MANAGE LAND?????
