Comments: I support the wilderness recommendations in Alternative D of the revised plan but I believe it should include all 230,000 wild roadless acres of the Gallatin Range as recommend wilderness. Mechanized and motorized vehicles should not be allowed or any other type of recreation that is not consistent with protecting the wilderness and the wildlife.

Also, the number of people and livestock/horses should be limited as research shows a significant negative impact when certain numbers are exceeded. I believe people should be able to enjoy nature but in a respectful and considerate way. Not by creating more trails in an already delicate area and upsetting the balance of nature by introducing fish that don't belong . Please take the proper steps to protect this area.
